

Take a Peek...

Our Dashboard is a Software as a Service (SaaS) Learning Management System that can handle ALL your workforce training – not just launch emTRAIN courses.

Our Enterprise LMS Dashboard can:

- * Sync with your HR System of Record to eliminate data entry
- * Schedule/Notify/Track In-Person Workshops
- * Include Custom Data Fields/Logins & Passwords
- * Generate Course Tracks for Groups of Learners
- * Launch/Track Any SCORM E-learning course, and more!

Now Only

\$5*

Take a Trial Run!

To make this an easy decision for you, we're offering a promotional price of \$5/learner, reduced from our regular price of \$30/learner, for use of the enterprise system until April 30, 2010. **To try out the system, we'll help you create your own interactive, trackable course that has an electronic signature for verification purposes.**

Open Enrollment for Benefits; Employee Handbook or Procedures Course; Product Knowledge Courses; Sales Training; Customer Service Training; Engineering Courses; Leadership Courses; A Course on Social Media Use or Email Etiquette, etc. Here's how:

1. Give us any MS Word Document (Employee Handbook, Social Media Policy, Rules & Procedures), and we'll make it into an e-learning course (text only) as seen at www.emtrain.com/emtrainlms; **OR**
2. Give us a MS PowerPoint presentation on any topic and we'll convert it into an e-learning course.

After April 2010, you get to retain all your training records and new e-learning course on your LMS Dashboard Basic and upgrade your LMS service when you're ready!

* Offer does not include installing more than 1 e-learning course onto the Dashboard. E-learning courses will reflect your MS PowerPoint presentation, so ensure your MS PowerPoint is exactly as you'd like your e-learning course. Other SCORM 1.2 or 2004 e-learning courses can be installed for \$500 per course and "installed" means it takes emTRAIN 1 time to load course files onto the Dashboard. Offer entails a minimum purchase for 250 learners.
